Dynamic and visionary sophomore with a solid foundation in Computer Science and a passion for Native App Development. Aspiring to evolve from a hands-on technical role to a strategic leadership position in a tech firm renowned for innovation. I am eager to leverage academic accolades, app development experience, and entrepreneurial initiative to contribute to cutting-edge advancements in AI/ML while fostering personal growth and continuous learning.

PROJECTS & EXTRACURRICULAR

News App with Preference List

July 2024

- NewsFeed is an Android application that allows users to stay updated with the latest news articles from various sources. The app integrates Google Sign-In for user authentication and Firebase for managing user sessions. Users can search for news articles, view detailed information, and manage a list of topics they are interested in.

Digital Assistant for Legal Awareness

March 2024

- Developed a digital legal assistant leveraging machine learning technologies to facilitate access to legal information and services for citizens in India. The project aimed to empower individuals, especially those from marginalized communities or with literacy challenges, by providing them with easy access to legal
- resources, legal aid, and the ability to connect with lawyers digitally.
